

ADMIXTURE 3120

BONDING ADDITIVE for MORTAR, STUCCO and PLASTER

ADMIXTURE 3120 IS A WATERBORNE COMPLEX BLEND OF LATEX POLYMERS AND SILICATES THAT IS USED INSTEAD OF WATER AS THE LIQUID FOR MIXING ALL CEMENT BASED MORTAR, AS WELL AS PATCHING AND PLASTER MATERIALS.

UNLIKE MANY GENERAL PURPOSE LATEX ADDITIVES, ADMIXTURE 3120 WILL NOT RETARD THE NATURAL HYDRATION OF THE PREPARED CEMENT / SAND MIXTURE.

ADMIXTURE INGREDIENTS ARE NON-CORROSIVE AND CHEMICAL RESISTANT. CONTAINS NO CALCIUM CHLORIDE.

CEMENTITIOUS MATERIALS MADE WITH ADMIXTURE 3120 INSTEAD OF WATER WILL YIELD UP TO DOUBLE THE STRENGTH AND THREE TIMES THE BONDING POWER OF ORDINARY CEMENT BASED MORTAR AND PATCHING MATERIALS.

USING ADMIXTURE 3120 WILL ENSURE GREATER BOND, TENSILE, COMPRESSIVE AND FLEXURAL STRENGTH OF THE PREPARED MATERIAL.

MORTAR AND PATCHING MATERIALS SET QUICKLY WITHOUT HYDRATION HEAT. EXPANSION AND CONTRACTION IS NEGLIGIBLE.

ADMIXTURE 3120 MAY BE USED WITH GREY OR WHITE PORTLAND CEMENT, MASONRY CEMENT, OR WITH THE PRE-PACKAGED MORTAR AND PATCHING MATERIALS.

WHERE COLORED MORTAR, PLASTER OR PATCHING MATERIALS ARE DESIRED, THE ADMIXTURE MAY BE TINTED WITH UNIVERSAL TINT COORS AVAILABLE IN MOST QUALITY PAINT DEPARTMENTS.

SUPER PLASTER APPLIED TO CONCRETE BLOCK AND INSULATION BOARD BUILD-OUTS

SUPER PLASTER

BASE AND FINISH PLASTERS MADE WITH ADMIXTURE 3120 AND YOUR SAND / CEMENT MIX.

COSTS LESS THAN TRADITIONAL STUCCO

**SUPER PLASTER IS SIMPLE TO USE:
APPLY WITH HAND TROWEL, HOPPER GUN
OR TEXTURE SPRAY EQUIPMENT**

ANY COLOR-ANY PATTERN or TEXTURE

DURABLE AND IMPACT RESISTANT

WATER, MOLD AND MILDEW RESISTANT

**USE ON: POLYSTYRENE CONCRETE
FORMS (ICF's), INSULATING SHEATHING,
MOLDED POLYSTYRENE BUILD-OUTS AND
TRIM, CONCRETE OR CONCRETE BLOCK,
EXISTING STUCCO SUBSTRATES**
